

gentlemen,  
i understand that there is a petition #04-160 before you that would discontinue the traffic and weather reports that i get on my xm radio.

when i'm on the road, i can tune to these stations and get the information when i need it, and don't have to search for a local station and then wait and hope that they will give more than a 30 second report.

i don't see any conflict with this service on xm.

thank you for your interest in my comments.
